PROFILE

I built Rumble Studio for iOS from scratch as its sole developer, launched it on iPhone, iPad, and Vision Pro, and owned every update. I bring 16 years of iOS experience, with deep expertise in Swift, SwiftUI, and UIKit. I set technical direction, own delivery from architecture through the App Store, partner with product and design, and mentor engineers. My independent projects extend that ownership across web and APIs, using AI-assisted development with hands-on review.

TECHNICAL SKILLS

iOS: Swift, SwiftUI, UIKit, Swift concurrency, iPhone, iPad, visionOS, App Store

Leadership: system architecture, technical direction, mentoring, code review, CI/CD, SDK and API design

Product: full-stack APIs, real-time audio and video (LiveKit, Agora), MVVM, XCTest

AI-assisted engineering: Cursor, ChatGPT Codex, Claude, MCP servers, agentic coding, hands-on review

EMPLOYMENT

Rumble

2023–2026

Lead iOS Developer (Studio) · Senior iOS Developer (Video) · Joined via Callin acquisition

- Sole iOS developer for Rumble Studio: took the app from scratch to the App Store, set the technical direction, and owned every update on iPhone, iPad, and Vision Pro.
- Partnered with design to turn ambitious product ideas into shipped iOS features, including custom UI so Vision Pro eye tracking can highlight each control.
- Integrated LiveKit for conference calls and multi-platform streaming with synchronized audio and video.

Callin

2022–2023

Lead iOS Developer · Acquired by Rumble (May 2023)

- Built a social audio and video platform from the ground up as lead iOS developer.
- Shipped low-latency live audio with Agora.
- Built audio-transcript sync with custom scrubbing and playback controls.

INDEPENDENT PROJECTS

Men of Hunger

2026–Present

Creator & Engineer · Independent

- Started as an independent nights-and-weekends project alongside my full-time role. Own the architecture and ship across API, web, and iOS using agentic coding with hands-on review.
- Shipped “Catch me up,” an AI feature that summarizes long conversations from the thread, images, and public profile.

Greenlane

2026–Present

Creator & Engineer · Independent

- Building a Mac tool that finds Apple App Review issues before submission by building, exploring, and checking iOS apps locally in Simulator.
