

John P. McGlone

Lead iOS & Product Engineer

Roanoke, VA · Remote · Full-time

I'm seeking a remote, full-time Senior, Staff, or Lead engineering role where I can bring deep iOS experience and hands-on product ownership. I'm also open to roles that span web and APIs.

PROFILE

I'm an iOS developer with 16 years of experience and deep expertise in Swift, SwiftUI, and UIKit. I set technical direction, partner with product and design, and own delivery from architecture through the App Store. As the sole iOS developer for Rumble Studio, I built and launched the app on iPhone, iPad, and Vision Pro, integrated LiveKit for live audio/video and multi-platform streaming, and owned every update. My independent work extends across web and APIs. I created and shipped Men of Hunger, owning its iOS app, API, and TypeScript, Vue.js, and Nuxt web app, with chat, video calls, voice messages, and AI conversation summaries.

TECHNICAL SKILLS

iOS: Swift, SwiftUI, UIKit, Swift concurrency, iPhone, iPad, visionOS, XCTest, App Store

Leadership: system architecture, technical direction, mentoring, code review, CI/CD, SDK and API design

Web & media: TypeScript, JavaScript, Vue.js, Nuxt, PostgreSQL, LiveKit, Agora

AI-assisted engineering: Cursor, ChatGPT Codex, Claude, MCP servers, agentic coding, hands-on review

EMPLOYMENT

Rumble

2023–2026

Lead iOS Developer (Studio) · Senior iOS Developer (Video) · Joined via Callin acquisition

- Sole iOS developer for Rumble Studio: took the app from scratch to the App Store, set the technical direction, and owned every update on iPhone, iPad, and Vision Pro.
- Partnered with design to turn ambitious product ideas into shipped iOS features, including custom UI so Vision Pro eye tracking can highlight each control.
- Integrated LiveKit for conference calls and multi-platform streaming with synchronized audio and video.

Callin

2022–2023

Lead iOS Developer · Acquired by Rumble (May 2023)

- Built a social audio and video platform from the ground up as lead iOS developer.
- Shipped low-latency live audio with Agora.
- Built audio-transcript sync with custom scrubbing and playback controls.

INDEPENDENT PROJECTS

Men of Hunger

2026–Present

Creator & Engineer · Independent

- Created and shipped a full-stack community product with a TypeScript, Vue.js, and Nuxt web app. Own architecture and delivery across web, API, and iOS, using AI-assisted development with hands-on review.
- Shipped “Catch me up,” an AI feature that summarizes long conversations from the thread, images, and public profile.

John P. McGlone

ADDITIONAL INDEPENDENT WORK

Greenlane

2026–Present

Creator & Engineer · Independent

- Building a Mac tool that finds Apple App Review issues before submission by building, exploring, and checking iOS apps locally in Simulator.

EARLIER EMPLOYMENT & CONTRACTS

Epihealthy · Lead iOS Developer (Contract)

2022

Shipped a real-time seizure detection app using CoreBluetooth for continuous health monitoring.

Rite Aid · Senior Product Mobile Specialist (Contract)

2021

Rebuilt mobile CI/CD in Azure DevOps with parallel builds.

Supersapiens · iOS Engineer (Contract)

2020–2021

Built SwiftUI charts for real-time glucose data.

Walmart Labs · Senior iOS Developer (Contract)

2020

Contributed to Walmart's newest iOS app, using UIKit and SwiftUI to replace the legacy client.

Airside Mobile · Senior iOS Developer

2019–2020

Built a SwiftUI app with MVVM and dependency injection so it could be tested.

AD:60 · Lead iOS Developer

2019

Built a financial education game with UIKit, Core Animation, and Lottie.

Eligible · Lead iOS Developer

2017–2019

Built a healthcare eligibility SDK for insurance coverage checks.

Layer · Senior iOS Developer

2016–2017

Refactored the messaging SDK so other teams could integrate it with less setup.

Imgur · Senior iOS Developer

2015

Built a UICollectionView image grid that stayed smooth while scrolling.

DocuSign · iOS Developer

2013–2014

Shipped StoreKit subscriptions.

Workday · iOS Developer

2011–2013

Won a company-wide hackathon with a drag-and-drop goal manager.

Northern Kentucky University (NKU) · Freelance Mobile Developer (Contract)

2009–2011

Built PulsePoint (originally firedepartment.mobi), a first-responder geolocation app

ADVISORY

Fandemic · Product & Engineering Advisor · Apr 2025–Present

Advise the founder on product and engineering alongside my engineering roles.

EDUCATION

Nassau Community College · 2006–2009

A.S. in Computer Science · Double major studies: Mathematics & Computer Science.

Computer Science GPA: 4.0 · Overall GPA: 3.8
