PROFILE

Lead iOS and product engineer. 16 years in Swift, SwiftUI, and UIKit, owning products from architecture through the App Store, across mobile, web, and APIs. I built Rumble Studio for iOS from scratch as its sole developer, shipped it on iPhone, iPad, and Vision Pro, and maintained every update. AI lets me take on more of the product. I build Men of Hunger across its API, web, and iOS apps with Cursor and Claude, and I still review what ships. I partner with design and mentor engineers.

I'm looking for a remote senior or lead iOS role where I own the mobile roadmap, set technical direction with product, and mentor engineers.

TECHNICAL SKILLS

iOS: Swift, SwiftUI, UIKit, Swift concurrency, iPhone, iPad, visionOS, App Store

Leadership: system architecture, technical direction, mentoring, code review, CI/CD, SDK and API design

Product: full-stack APIs, real-time audio and video (LiveKit, Agora), MVVM, XCTest

AI-assisted engineering: Cursor, ChatGPT Codex, Claude, MCP servers, agentic coding, hands-on review

EXPERIENCE

Men of Hunger

2026–Present

Creator & Engineer · Independent

- Own the architecture and ship a men-only social platform across its API, web, and iOS apps, using agentic coding with hands-on review.
- Shipped “Catch me up,” an AI feature that summarizes long conversations from the thread, images, and public profile.
- Built and maintain a custom MCP server for admin insights and for scheduling posts and newsletters.

Greenlane

2026–Present

Creator & Engineer · Independent

- Building a Mac tool that finds Apple App Review issues before submission by building, exploring, and checking iOS apps locally in Simulator.
- The dashboard and CLI show findings, screenshots, build logs, and crash locations, with live progress.

Rumble

2023–2026

Lead iOS Developer (Studio) · Senior iOS Developer (Video) · Joined via Callin acquisition

- Sole iOS developer for Rumble Studio: took the app from scratch to the App Store, set the technical direction, and owned every update on iPhone, iPad, and Vision Pro.
- Partnered with design to turn ambitious product ideas into shipped iOS features, including custom UI so Vision Pro eye tracking can highlight each control.
- Contributed to Rumble Video as a senior iOS developer alongside sole ownership of Studio.
- Integrated LiveKit for conference calls and multi-platform streaming with synchronized audio and video.
